

Global Solutions for Business Restructuring

Premier Global Network of Independent Professionals

BTG Global Network (BTG GN) is the premier global network of independent professionals working with declining businesses.

BTG GN is multi-disciplinary. Its members have a broad range of professional skills, including all of those needed to provide overall solutions to business problems. They include lawyers, accountants, insolvency practitioners, forensic investigators, profit improvement consultants, turnaround and restructuring managers and a host of other specialists.

BTG GN members are leading players in their markets and have an international outlook, which reflects the increasingly global nature of business today.

A Unique Resource

BTG GN provides a unique resource. Its members are respected professionals, with an in-depth knowledge of their own markets and an ability to identify practical strategies to maximise the outcome from their assignments.

Business problems are more common than the skills needed to deal with them. Professional capacity in the global restructuring and insolvency market is an issue in all except the most developed jurisdictions.

BTG GN members are able to bring together resources to carry out their assignments effectively, using local and regional experts to provide international solutions.

Cost-effective Solutions

Finding cost-effective solutions is a key issue for struggling businesses and their stakeholders, whether they are operating in developed or emerging economies.

Members of BTG GN understand the need to add value through their work, so that their input to a declining business is not a cost, but a net benefit for the stakeholders.

Because BTG GN is a multi-disciplinary network, it can provide a team for each assignment who will work together to cover all requirements and avoid unnecessary duplication in professional costs.

BTG GN members have an international outlook, so they are able to operate comfortably and effectively in cross border situations, either with fellow network members or other overseas professionals and stakeholders.
