

Global Solutions for Business Restructuring

Begbies Global Network (BGN) is the premier global network of independent professionals working with declining businesses.

BGN is multi-disciplinary. Its members have a broad range of professional skills, including all of those needed to provide overall solutions to business problems. They include lawyers, accountants, insolvency practitioners, forensic investigators, profit improvement consultants, turnaround and restructuring managers and a host of other specialisms.

BGN members are leading players in their markets and have an international outlook, which reflects the increasingly global nature of business today.

Begbies Global Network provides a unique resource.

Its members are respected professionals, with an in depth knowledge of their own markets and an ability to identify practical strategies to maximise the outcome from their assignments.

Business problems are more common than the skills needed to deal with them. Professional capacity in the global restructuring and insolvency market is an issue in all except the most developed jurisdictions.

BGN members are able to bring together resource to carry out their assignments effectively using local and regional experts to provide international solutions.

Finding cost-effective solutions is a key issue for struggling businesses and their stakeholders, whether they are operating in developed or emerging economies.

Members of the Begbies Global Network (BGN) are sensitive to the need to add value through their work, so that their input to a declining business is not a cost, but a net benefit for the stakeholders.

BGN is a multi-disciplinary network. For each assignment it can provide a team, which can work together to cover all requirements and avoid unnecessary duplication in professional costs.

BGN members have an international outlook, so that they are able to operate comfortably and effectively in cross border situations, either with fellow BGN members or other overseas professionals and stakeholders.
